WHO WE ARE

MAN Agri is the latest addition to MAN Group SA, specialising in the acquisition of commercial farms and innovative, technology-driven farming focused on cash crops and cattle farming. The company is committed to enhancing agricultural productivity through sustainable practices, precision farming, and data-driven decision-making.

MAN Agri is a future-focused farming company driving sustainable crop and cattle production through innovation and technology.

MAN Agri, is committed to building **self-sustaining agricultural ecosystems** that support **food security, economic growth,** and **long-term sustainability** in South Africa.

- 01 Driving food security through advanced, technology-led farming practices
- 02 Contributing to economic growth via strategic agricultural investments
- 03 Promoting sustainability through regenerative crop and livestock systems
- 04 Leading modern agribusiness with innovative land development and precision farming
- 05 Strengthening the agricultural sector with data-driven and eco-friendly solutions

OUR VISION

CORE SPECIALTIES

CASH CROP PRODUCTION

- Utilisation of precision farming techniques to **optimise yield** and **resource efficiency**.
- Adoption of **drought-resistant** and **high-yield seed varieties** to ensure sustainable output.
- **Advanced irrigation** and soil health monitoring for long-term farm sustainability.

FARM ACQUISITION & DEVELOPMENT

- **Strategic identification** and acquisition of **high-potential commercial farms**.
- Implementation of **modern land rehabilitation** and **soil enhancement** techniques.

CATTLE FARMING

- Integration of **scientific breeding programs** to **enhance livestock genetics** and productivity.
- **Regenerative grazing systems** that promote **environmental balance** and **soil health**.
- Efficient feedlot management for improved **growth rates** and **sustainability**.

INNOVATION & SUSTAINABILITY

MAN Agri leverages cutting-edge agricultural technologies, including **satellite monitoring, soil sensors,** and **data analytics,** to optimise both crop and livestock management.

The company is committed to **eco-friendly farming practices,** ensuring **minimal environmental impact** while maximizing output.
